MAC-X

EMMEGISOFT MACHINE SOFTWARE

Web software for displaying in real-time and monitoring the production activities carried out by one or more automatic machines and/or manual work stations. Production data (status, times) can be automatically collected by cut-off machines, cutting centres and machining centres equipped with Machine Supervisor, as well as by manual work stations equipped with a license for workshop operator. Production status is displayed in real-time via an intuitive graphic synoptic (ZOOMER function), while production data can be consulted by comprehensive graphic reports. By DRIVER option, data can be exported towards external management software (ERP, MES, &hellip).
